[Mathematical Analysis Of Scissor Lifts](#)

An elevator (North American English) or lift (Commonwealth English) is a type of vertical cable transportation machine that moves people or freight between floors, levels, or decks of a building, vessel, or other structure. Elevators are typically powered by electric motors that drive traction cables and counterweight systems such as a hoist, although some pump hydraulic fluid to raise a ...

Plumb Line Analysis. The plumb line, as used in postural analysis, serves as a visual comparison to the line of gravity. For example, when the plumb line is centered over S1, it should fall in line with the occipital protuberance. In uncompensated scoliosis, however, it will be seen to fall lateral to the occipital protuberance. Weight Bearing.

Our analysis highlights the tensions, opportunities and challenges faced by citizens in creating policy. Drawing from our findings, we stress the need for HCI to be actively involved in supporting, innovating and (re)designing civic policymaking processes while emphasising design considerations for the development of technological tools.
